Cybersecurity Services

Shield your business.

Stay safe from growing digital risks with reliable security that keeps your data secure and your operations running smoothly.

Monitoring, Detection & Automation

Incident Handling & Deep Investigation

Data Loss Prevention

Proactive Risk & Exposure Management

Threat Intelligence & Advanced Detection

Governance, Compliance & Human Layer

Strengthen Your Defense

Cyber threats continue to evolve, making a strong security foundation essential. The right safeguards help prevent disruptions, protect your information, and ensure business continuity.

Eagle delivers end-to-end cybersecurity to protect your business from evolving digital threats. With expert-led protection, continuous monitoring, and rapid response, we help you stay secure, resilient, and compliant.

Monitoring, Detection & Automation

Our 24/7 watchtower continuously monitors systems, actively hunting, identifying, and neutralizing sophisticated threats the moment attackers strike.

Incident Handling & Deep Investigation

On-demand incident response and forensic analysis contain breaches, preserve evidence, trace attackers, reconstruct timelines, and strengthen future security.

Data Loss Prevention

Deploy DLP controls to block unauthorized access, monitor endpoints and email, and prevent data leakage and exfiltration.

Proactive Risk & Exposure Management

Automated and manual penetration testing across networks, servers, and endpoints identifies vulnerabilities, prioritizing risks for detailed reporting.

Threat Intelligence & Advanced Detection

Curated intelligence and MITRE ATT&CK-mapped threat hunting uncover hidden risks, exposed data, brand impersonation, and enable containment.

Governance, Compliance & Human Layer

Security governance strengthens policies, while phishing simulations evaluate employee awareness to provide actionable insights for security improvement.

Cybersecurity Services

Shield your business.

Stay safe from growing digital risks with reliable security that keeps your data secure and your operations running smoothly.

Service Offerings

Monitoring, Detection & Automation

Continuous security monitoring and managed services to detect, investigate, and respond to evolving cyber threats.

- **SOC 24×7 Monitoring**
  SIEM monitors, detects, investigates, and responds.
- **Managed Security**
  Complete security monitoring and management across systems.
- **Security Orchestration, Automation, and Response (SOAR)**
  Automate, orchestrate, correlate, and manage security operations.

Incident Handling & Deep Investigation

Respond quickly to security incidents using expert support for containment, investigation, preservation, and full recovery.

- **Incident Response Retainer**
  Pre-agreed response hours provide rapid containment guidance.
- **Digital Forensics & Investigation**
  Investigate systems, delivering detailed final investigation reports.
- **Expert Incident Support**
  Strengthen incident readiness to minimize business impact.

Data Loss Prevention

Proactively monitor and control data to prevent unauthorized access, leakage, and exfiltration across endpoints.

- **Data Movement Monitoring**
  Control sensitive data across endpoints and email.
- **Policy & Privilege Monitoring**
  Detect policy violations, privilege misuse, and data access.
- **Leakage Prevention**
  Reduce data leakage through continuous DLP controls.

Proactive Risk & Exposure Management

Assess IT environments using targeted vulnerability assessments and penetration testing to address security weaknesses effectively.

- **Vulnerability Assessments**
  Scanning systems to find security gaps.
- **Penetration Testing**
  Ethical hacking to simulate real-world attacks.
- **Remediation & Reporting**
  Deliver clear remediation guidance and final reporting.

Threat Intelligence & Advanced Detection

Proactive threat hunting and actionable intelligence uncover hidden risks to accelerate effective incident response.

- **Proactive Threat Hunting**
  Expose threats using intelligence and MITRE ATT&CK mapping.
- **Threat Intelligence & IR Advisory**
  Direct threat hunting, containment, and forensics.
- **Actionable Threat Insights**
  Detect credential leaks, impersonation, and emerging threats.

Governance, Compliance & The Human Layer

Strengthen security through effective governance, compliance advisory, and employee awareness.

- **Security Policy & Governance Advisory**
  Meeting legal standards like GDPR, DPDPA, HIPAA, or ISO 27001.
- **Security Awareness & Phishing Simulation**
  Phishing simulations, assessments, and recommendations.
- **Improved Security Resilience**
  Governance and trained employees strengthen security controls.
